CBR-RAG → master 01.04.2026, 15:14

WC02

Dear Participant,

As part of my Master's thesis at Goethe University Frankfurt, I am conducting a study examining how well AI-generated explanations help people understand BPMN process diagrams, with a focus on answering why-questions through Case-Based Reasoning Retrieval-Augmented Generation (CBR-RAG), an AI-driven approach that retrieves relevant past cases to generate explanations.

You are kindly invited to participate in this brief questionnaire. **The survey will take approximately 20-25 minutes to complete. We recommend completing it on a laptop or desktop computer, as the diagrams and rating scales may not display optimally on a mobile device.** Please be assured that all data collected in this study will be processed in strict accordance with the General Data Protection Regulation (GDPR). Your responses will be treated with full confidentiality and published exclusively in anonymized form, ensuring that no conclusions about your identity can be drawn from the data. All data will be used solely for the purposes of this research project and will not be shared with any third parties.

Please ensure that you complete the questionnaire in one sitting, without interruption. By clicking the button below to begin the study, you confirm that you have read and fully understood this participant information sheet and that you consent to taking part in this study.

Your participation is greatly appreciated. Thank you sincerely for your time and support.

If you have any questions or concerns, please feel free to contact the Graduate Researcher at s8641599@stud.uni-frankfurt.de at any time.

Yassamin Asgari, Master Business Informatics
Prof. Dr. Mirjam Minor, Department of Informatics

Johann Wolfgang Goethe University Frankfurt

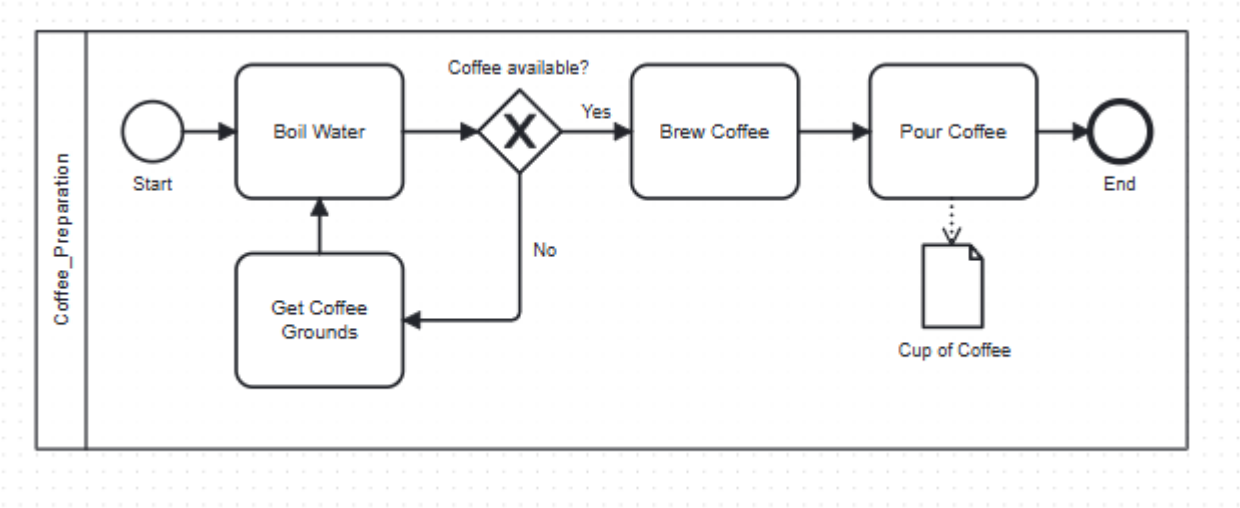
WC01

☐ I have read and understood the participant information sheet above and agree to participate in the study.

BP02

Introduction – What is a BPMN?

An Example:



Process Explanation: The process begins with boiling water. Next, it checks whether coffee grounds are available. If yes, the coffee is brewed and poured, and a Cup of Coffee is produced. If no coffee grounds are available, they are first retrieved and the process starts again from the beginning.

Business Process Model and Notation (BPMN) provides a standardized graphical framework for visualizing and documenting business processes. Through structured, flowchart-based diagrams, BPMN enables the systematic representation of tasks, their sequential arrangement, and the underlying decision logic within a process. The key BPMN symbols referenced throughout this study are outlined in the table below:

Element	Description	Notation
Start Event	Indicates where a particular process will start.	
End Event	Mark the completion of a process.	
Activity	Are activities that represent individual steps within a process.	
Data Object	Provide information about what Activities require to be performed and/or what they produce.	
Exclusive Gateway (XOR)	Are used when several conditions are mutually exclusive and only one selection is possible.	
Parallel Gateway (AND)	Activate all outgoing branches simultaneously. They wait for all incoming branches to be completed before continuing the sequence flow.	
Sequence Flow	Connect events, gateways, tasks, and subtasks.	
Association	Combine data objects and artifacts with other elements.	

D001

What is your age group?

- Under 18
- 18–24
- 25–34
- 35–44
- 45–54
- 55 or older

D002

Which most accurately describes you?

- Woman
- Man
- Non-binary
- Other
- I prefer not to say

S101

How would you rate your ability to read a BPMN diagram?

- I cannot read BPMN at all
- I can read basic diagrams
- I am comfortable with BPMN

S102

How often do you travel by air?

- ◯ Never
- ◯ Rarely
- ◯ Occasionally
- ◯ Frequently
- ◯ Very Frequently / Always

Page 04

SI

SI01

In this study you will compare and evaluate the answers of two **helpful airport chatbots**. You will see 18 diagrams depicting typical airport processes, each accompanied by a question and two answers, Answer A and Answer B, generated by two different AI systems. You will not know which system produced which answer, as the labels are randomised per question. Please rate each answer independently on the dimensions provided, using a scale from **strongly agree to strongly disagree**. Additionally, please indicate which of the two answers you preferred, if any. The **red circle** indicates where to focus for that particular question, so you are not overwhelmed by the full diagram.

You may notice that some diagrams appear more than once. This is intentional, as each diagram is paired with a different or slightly different question, so please read each question carefully and evaluate the answers in relation to that question.

There is no single correct answer. Simply rate how well each explanation helps you understand the process.

Q101

You are at the automated Baggage Drop-off and ask: Why do I need to print a Baggage Tag?

Answer A: You need to print a Baggage Tag, in order to attach it to your Baggage in the next step.

	strongly agree	agree	neutral	disagree	strongly disagree
This answer matches the process model (grounded)	○	○	○	○	○
The answer is helpful	○	○	○	○	○

Q108

You are at the Check-In Counter and ask: Why do I need a Boarding Pass?

Answer A: You need a Boarding Pass because it contains important information about your flight, such as your seat number, flight number, and barcode. This information is used by airline staff to check you in and ensure you get on the right plane.

	strongly agree	agree	neutral	disagree	strongly disagree

Q103

You are at the automated Baggage Drop-off and ask: Why do I need the Baggage Tag, which is printed by the Kiosk mashine?

Answer A: The Baggage Tag is printed by the Kiosk machine so that it can be attached to your luggage and easily identified by the airline staff. This helps them to quickly locate your baggage and ensure it's loaded onto the correct flight.

	strongly agree	agree	neutral	disagree	strongly disagree

Q111

You are at the Baggage Handover and ask: Why does the agent need to print a Baggage Tag?

Answer A: The agent needs to print a Baggage Tag because it contains important information about the baggage, such as the baggage tag number, barcode, flight number, and name. This information is used to identify and track the baggage. The Baggage Tag is printed after the baggage has been weighed and measured.

Q109

You are at the Check-In Counter and ask: Why does my Boarding Pass need to be issued?

Answer A: Your Boarding Pass needs to be issued because it contains important information such as your name, seat number, flight number, and a barcode which you will need to pass the Security E-Gate.

	strongly agree	agree	neutral	disagree	strongly disagree
This answer matches the process model (grounded)	○	○	○	○	○

This answer sounds natural	○	○	○	○	○
This answer is the right length	○	○	○	○	○
I trust this answer	○	○	○	○	○

Q110

Answer B: Your Boarding Pass needs to be issued after the airline agent has verified your identity and selected your seat, and also after the baggage handover process has been completed. This is because the Boarding Pass requires certain information, such as your seat number, which is only available after these steps have been completed.

	strongly agree	agree	neutral	disagree	strongly disagree

Q141

You are at the Baggage Handover and ask: Why does my Baggage need to be weighed?

Answer A: The weight of your Baggage needs to be checked so that the correct baggage tag can be issued. This is a standard procedure to ensure that your Baggage is properly identified and tracked.

Q143

You are at the automated Baggage Drop-off and ask: Why do I need to place my Passport on the Kiosk scanner?

Answer A: You need to place your Passport on the Kiosk scanner because the system needs to read the barcode from your passport to proceed with the baggage drop-off process.

Q139

You are at the Check-In Counter and ask: Why is a seat selected at all?

Answer A: A seat is selected so that the airline can assign a specific seat to the passenger, which is then included in the boarding pass. This way, the passenger knows exactly where to sit on the plane.

Q147

You lost your Baggage and ask: Why do I hand in my lost Baggage Form?

Answer A: You hand in your lost Baggage Form so that we can verify your identity and check if your baggage is indeed missing. This form will be used to process your lost baggage claim.

	strongly agree	agree	neutral	disagree	strongly disagree
This answer matches the process model (grounded)	○	○	○	○	○
The answer is helpful	○	○	○	○	○

This answer sounds natural	○	○	○	○	○
This answer is the right length	○	○	○	○	○
I trust this answer	○	○	○	○	○

Q148

Answer B: You hand in your lost Baggage Form to the Agent so that they can log the lost baggage into the system. This is necessary because the system requires the baggage tag number to process the lost baggage claim.
