

CBR-RAG → master

13.04.2026, 09:44

Dear Participant,

As part of my Master's thesis at Goethe University Frankfurt, I am conducting a study examining how well AI-generated explanations help people understand BPMN process diagrams, with a focus on answering why-questions through Case-Based Reasoning Retrieval-Augmented Generation (CBR-RAG), an AI-driven approach that retrieves relevant past cases to generate explanations.

You are kindly invited to participate in this brief questionnaire. **The survey will take approximately 20-25 minutes to complete. We recommend completing it on a laptop or desktop computer, as the diagrams and rating scales may not display optimally on a mobile device.** Please be assured that all data collected in this study will be processed in strict accordance with the General Data Protection Regulation (GDPR). Your responses will be treated with full confidentiality and published exclusively in anonymized form, ensuring that no conclusions about your identity can be drawn from the data. All data will be used solely for the purposes of this research project and will not be shared with any third parties.

Please ensure that you complete the questionnaire in one sitting, without interruption. By clicking the button below to begin the study, you confirm that you have read and fully understood this participant information sheet and that you consent to taking part in this study.

Your participation is greatly appreciated. Thank you sincerely for your time and support.

If you have any questions or concerns, please feel free to contact the Graduate Researcher at s8641599@stud.uni-frankfurt.de at any time.

Yassamin Asgari, Master Business Informatics
Prof. Dr. Mirjam Minor, Department of Informatics

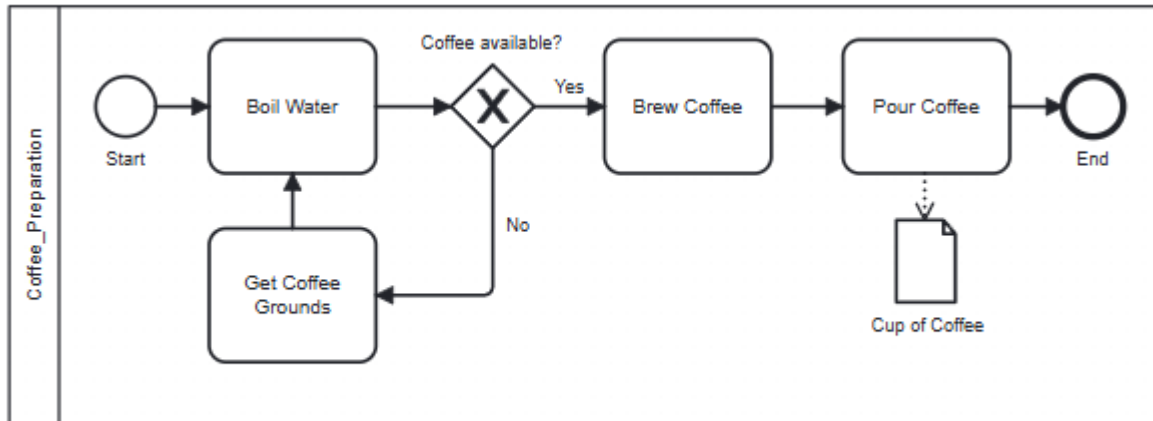

Johann Wolfgang Goethe University Frankfurt

WC01 

☐ I have read and understood the participant information sheet above and agree to participate in the study.

Introduction – What is a BPMN?

An Example:

Process Explanation: The process begins with boiling water. Next, it checks whether coffee grounds are available. If yes, the coffee is brewed and poured, and a Cup of Coffee is produced. If no coffee grounds are available, they are first retrieved and the process starts again from the beginning.

Business Process Model and Notation (BPMN) provides a standardized graphical framework for visualizing and documenting business processes. Through structured, flowchart-based diagrams, BPMN enables the systematic representation of tasks, their sequential arrangement, and the underlying decision logic within a process. The key BPMN symbols referenced throughout this study are outlined in the table below:

Element	Description	Notation
Start Event	Indicates where a particular process will start.	
End Event	Mark the completion of a process.	
Activity	Are activities that represent individual steps within a process.	
Data Object	Provide information about what Activities require to be performed and/or what they produce.	
Exclusive Gateway (XOR)	Are used when several conditions are mutually exclusive and only one selection is possible.	
Parallel Gateway (AND)	Activate all outgoing branches simultaneously. They wait for all incoming branches to be completed before continuing the sequence flow.	
Sequence Flow	Connect events, gateways, tasks, and subtasks.	
Association	Combine data objects and artifacts with other elements.	

What is your age group?D001 

- ☐ Under 18
- ☐ 18–24
- ☐ 25–34
- ☐ 35–44
- ☐ 45–54
- ☐ 55 or older

Which most accurately describes you?D002 

- ☐ Woman
- ☐ Man
- ☐ Non-binary
- ☐ Other
- ☐ I prefer not to say

How would you rate your ability to read a BPMN diagram?S101 

- ☐ I cannot read BPMN at all
- ☐ I can read basic diagrams
- ☐ I am comfortable with BPMN

S102 

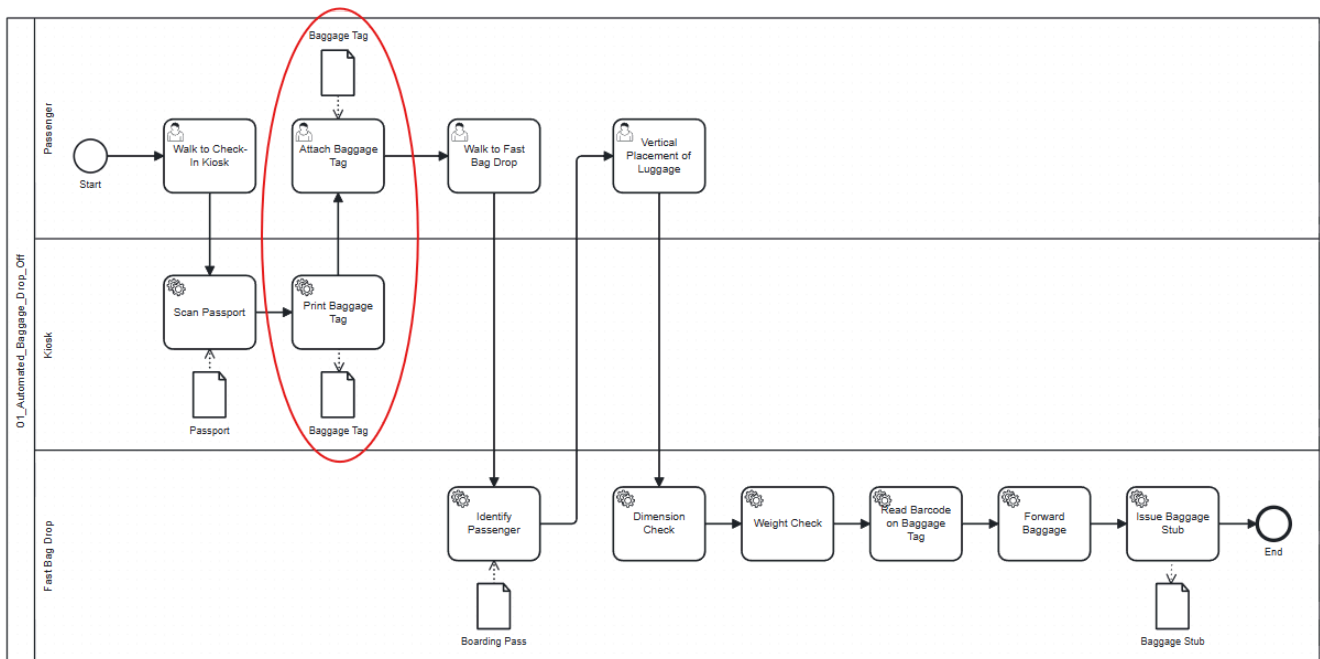

How often do you travel by air?

- ☐ Never
- ☐ Rarely
- ☐ Occasionally
- ☐ Frequently
- ☐ Very Frequently / Always

In this study you will compare and evaluate the answers of two **helpful airport** **q&a systems**. You will see 18 diagrams depicting typical airport processes, each accompanied by a question and two answers, Answer A and Answer B, generated by two different AI systems. You will not know which system produced which answer, as the labels are randomised per question. Please rate each answer independently on the dimensions provided, using a scale from **strongly agree to strongly disagree**. Additionally, please indicate which of the two answers you preferred, if any. The **red circle** indicates where to focus for that particular question, so you are not overwhelmed by the full diagram.

You may notice that some diagrams appear more than once. This is intentional, as each diagram is paired with a different or slightly different question, so please read each question carefully and evaluate the answers in relation to that question.

There is no single correct answer. Simply rate how well each explanation helps you understand the process.

Q101

You are at the automated Baggage Drop-off and ask: Why do I need to print a Baggage Tag?

Answer A: You need to print a Baggage Tag, in order to attach it to your Baggage in the next step.
